#### **ABSTRACT**

Used to determine grant rates for state financial support and as an accountability report to citizens, this unit cost report presents data for fiscal year (FY) 1992 on course offerings, enrollments and costs for Illinois public community colleges. Specifically, data are presented on midterm enrollments in student semester credit hours; costs for direct instructional salaries; direct departmental costs, such as contractual services, supplies, travel, and equipment; direct instructional equipment costs; and indirect costs in total dollar amounts. Highlighted findings include the following: (1) the average net instructional unit cost in the community colleges was \$123.44, an increase of \$1.70 from FY 1991; (2) the average full instructional unit cost was \$129.24; (3) state average instructional costs per unit included direct salary costs of \$47.83, direct department costs of \$8.81, and direct equipment costs of \$1.32; (4) state average support services costs per unit included academic administration and planning costs of \$10.32, learning resources costs of \$4.58, and student services costs of \$11.52; (5) state average unit costs were \$125.85 for Baccalaureate and General Academic programs, \$134.11 for Business Occupational programs, and \$99.67 for General Studies programs; and (6) public service expenditures decreased \$1.9 million in FY 1992. Unit cost totals from FY 1986 through FY 1992, and comparative data for the different campuses in the Illinois system are provided. (PAA)

#### HIGHLIGHTS OF THE FISCAL YEAR 1992 UNIT COST REPORT FOR ILLINOIS PUBLIC COMMUNITY COLLEGES

- 1. The fiscal year 1992 state average net instructional unit cost in the public community college system in Illinois was \$123.44. This represents an increase of \$1.70 (1.4 percent) from the fiscal year 1991 state average of \$121.74. Net instructional unit costs from fiscal year 1986 through fiscal year 1992 are shown in this report (see pages 3 and 4 for details).
- 2. The fiscal year 1992 state average unit cost measures calculated in this study were:

net instructional unit cost	\$123.44
full instructional unit cost	\$129.24
total institutional unit cost	\$139.26

(See pages 5 and 6 for details.)

3. The fiscal year 1992 state average unit costs for the cost categories that comprise instruction in Illinois public community colleges were:

direct salary cost	\$47.83
direct department cost	\$8.81
direct equipment cost	\$1.32
allocated indirect cost	\$48.79
operation and maintenance cost	\$16.21
building rental cost	\$.38

(See pages 7 and 8 for details.)

4. The state average unit costs for support services in the public community colleges of Illinois during fiscal year 1992 were as follows:

academic administration and planning cost	\$10.32
learning resources cost	<b>\$4.5</b> 8
student services cost	\$11.52
administrative data processing cost	\$3.46
general administration cost	\$8.74
auxiliary services cost	\$.42
general institutional cost	<b>\$9.75</b>

(See pages 9 and 10 for details.)

#### FY 1992 Unit Cost Report

5. The Fiscal Year 1992 Unit Cost Study analyzed unit costs in the seven instructional categories utilized for state funding purposes. The differential funding for these seven categories is based on their differential unit costs. The state average unit cost, excluding State Community College of East St. Louis, for each category is shown below:

Baccalaureate and General Academic	\$125.85
Business Occupational	\$134.11
Technical Occupational	\$150.92
Health Occupational	\$180.07
Remedial Education	\$118.65
Adult Basic Education/	
Adult Secondary Education (ABE/ASE)	\$87.72
General Studies	\$99.67

(See pages 11 and 12 for details.)

6. Public service expenditures decreased \$1.9 million in fiscal year 1992 to \$65.8 million. Public service includes noncredit community education and community service activities for governmental agencies, local business and industry, and the general community.

#### INTRODUCTION

The Unit Cost Study is an annual project involving the direct participation of all public community colleges in Illinois. Each college submits basic data on course offerings, enrollments, and costs to the Illinois Community College Board staff, who in turn check the data for consistency with credit hour claims and financial reports and then compile the various reports of the Unit Cost Study.

The Unit Cost Study provides the Illinois Community College Board and the Illinois Board of Higher Education with information needed to perform their planning and coordinating functions. It also provides the individual community colleges with a useful tool in local planning, evaluation, and management. The study provides the basic cost information for determining the credit hour grant rates that are the basis for state financial support to public community colleges. In addition, the Unit Cost Study is an accountability report to the citizens of each public community college district.

Every effort has been made in the design of the Unit Cost Study to ensure comparability among colleges. The effective utilization of the Fiscal Management Manual by the colleges establishes consistency in financial data from college to college. In addition, the ICCB has developed a Unit Cost Study Manual which provides detailed procedures for conducting the Unit Cost Study. Specific descriptions and definitions of the basic functions and cost centers also are contained in this manual. Nevertheless, caution must be exercised in making direct comparisons among colleges. Environmental characteristics and historical trends vary among public community colleges and must be taken into consideration when comparing unit costs. Several factors which may contribute to high unit costs are high faculty salaries, a high proportion of vocational curricula, and low enrollments. On the other hand, high enrollments and a large proportion of low-cost curricula are among factors which contribute to low unit costs.

The Unit Cost Study consists of basic enrollment and cost data. Direct instructional cost data are supplied by each college for each instructional area offered. These data include midterm enrollments in student semester credit hours; costs for direct instructional salaries; direct departmental costs, such as contractual services, supplies, travel, and equipment; and direct instructional equipment costs. Indirect costs also are reported by each college in total dollar amounts. The Unit Cost Study computer programs allocate these indirect costs to each function (instruction, organized research, public service) and then to each instructional area on the basis of the proportion of student semester credit hours generated in a given instructional area.

The unit costs in this report are shown for a student semester credit hour. The unit "student semester credit hour" is an output measure of instruction, defined as one student taking one semester credit of coursework. (Colleges on the quarter system convert quarter hours to semester hours.) One full-time equivalent (FTE) student is defined as 30 student semester credit hours.

The Unit Cost Study includes all expenses from both general operating and restricted purposes funds of the community colleges that are expended for instruction, organized research, and public service. It includes expenditures from local taxes, student tuition and fees, other local sources, state grants, and federal grants. Also included are expenses for equipment and building repairs, renovations, and remodeling that are locally funded and are not reimbursed by the state.

Not included are the full costs for the construction of new facilities, site purchase, site improvement, or interest and principal on any bonded indebtedness. Building depreciation costs are included in the Full Instructional Unit Cost.

Finally, a report is available upon request which lists the fiscal year 1992 statewide average net instructional unit cost by instructional subject area designated by the program classification system (PCS) codes and six-digit Classification of Instructional Program (CIP) codes for all public community colleges in Illinois. This report details the cost per student semester credit hour by each cost category for each instructional subject area and is similar to detailed reports showing the unit cost and total cost by instructional subject area previously produced for each community college.

#### Section I

#### COMPARISON OF FISCAL YEAR 1992 NET INSTRUCTIONAL UNIT COST WITH PREVIOUS YEARS

The results of the Fiscal Year 1992 Unit Cost Study show that the state average net instructional unit cost in the public community colleges of Illinois has increased from \$121.74 in fiscal year 1991 to \$123.45 in fiscal year 1992, an increase of \$1.70 (1.4 percent). Table 1 shows the state average net instructional unit cost and the annual percent change since fiscal year 1986.

Table 1

STATE AVERAGE NET INSTRUCTIONAL UNIT COST IN
ILLINOIS PUBLIC COMMUNITY COLLEGES SINCE FISCAL YEAR 1986

	FY 1986	FY 1987	FY 1988	FY 1989	FY 1990	FY 1991	FY 1992
Average Net Instructional Unit Cost	\$92.03	\$99.82	\$103.92	\$110.53	\$116.16	\$121.74	\$123.44
Percent Change from Previous Year	+9.8%	+8.5%	+4.1%	+6.1%	+5.1%	+4.8%	+1.4%

Table 2 shows the net instructional unit costs for each of the public community colleges in Illinois since fiscal year 1986. College of DuPage-Open Campus only operated between fiscal years 1982 through 1985; therefore, cost data are limited to those years. Fiscal year 1985 was the final year the Chicago Urban Skills Institute functioned as a separate college in the City Colleges of Chicago, and fiscal year 1991 was the final year for Black Hawk College-East Campus. Although the unit cost study has been modified during the past 13 years, the comparability of instructional costs from year to year has been preserved.

#### Section II

## FISCAL YEAR 1992 NET INSTRUCTIONAL UNIT COST, FULL INSTRUCTIONAL UNIT COST, AND TOTAL INSTITUTIONAL UNIT COST

Three distinct summary unit costs are calculated in the ICCB Unit Cost Study: net instructional unit cost, full instructional unit cost, and total institutional unit cost. The unit cost most often used is net instructional unit cost. This is the unit cost used in the state funding formula, as well as in most comparative analyses. Table 3 shows the state average unit cost and cost per full-time equivalent (FTE) student for each of these three unit cost types.

Table 4 lists the three types of unit cost for each community college district. The first unit cost shown is the net instructional unit cost. This unit cost includes the direct and indirect costs for instruction. The second is the full instructional unit cost, which comprises net instructional costs, other costs (the chargeback costs of sending students to other community colleges and the 80 percent federal share of college work-study students), building remodeling and renovation costs, and building depreciation costs. Full instructional unit cost represents the total cost of the instruction function within each college.

In addition to instruction, colleges have two other functions: public service and organized research. The unit costs of these functions also are shown in Table 4. Organized research is generally a minor function in the community colleges; however, public service is typically a major function. The total institutional unit cost in the last column represents the sum of the full instructional unit cost, organized research unit cost, and the public service unit cost.

Total dollar costs for each of these categories are shown in Table A-1 of the Appendix.

Public service costs, which represent the cost of noncredit community education and community service activities provided by the colleges to governmental agencies, business and industry, and the community itself, dropped to \$65,825,970. This is a decrease of 2.9 percent from fiscal year 1991.

Table 3

COMPARISON OF FISCAL YEAR 1992 UNIT COST
BY TYPE OF COST IN ILLINOIS PUBLIC COMMUNITY COLLEGES

Type of Cost	FY 1992 Statewide Average Unit Cost	FY 1991 State Average Cost Per FTE Student
Net Instructional Cost	\$123.44	\$3,703
Full Instructional Cost	\$129.24	\$3,878
Total Institutional Cost	\$139.26	\$4,178

#### Section III

#### FISCAL YEAR 1992 NET INSTRUCTIONAL UNIT COST

Net instructional unit cost includes direct instructional salary costs, direct departmental costs, direct instructional equipment costs, allocated costs, operation and maintenance costs, and building rental costs. Allocated costs consist of various indirect costs (allocated by ICCB computer programs), including cost of learning resources, student services, data processing, general administration, general institutional services, and academic administration and planning. Table 5 shows a state summary of the fiscal year 1992 average unit costs and cost per full-time equivalent student included in net instructional cost. Table 6 presents these unit costs for each district. Total dollar expenditures by district for the net instructional cost classifications are shown in Table A-2 of the Appendix.

Costs for the instruction function include expenditures for all of the cost classifications in all of the instructional categories from baccalaureate/general education through general studies. In comparing the unit cost of an individual community college, one must keep in mind that some types of programs generally cost more than others; therefore, a college with more expensive programs would be expected to have a higher overall unit cost. Additionally, smaller colleges would be expected to have higher unit costs than larger districts due partly to economies of scale and the need for a minimum level of personnel, physical plant, equipment, and library holdings necessary to maintain comprehensive programs.

Table 5

SUMMARY OF FISCAL YEAR 1992 NET INSTRUCTIONAL UNIT COST BY COST CATEGORIES IN ILLINOIS PUBLIC COMMUNITY COLLEGES

#### Section IV

#### FISCAL YEAR 1992 INDIRECT INSTRUCTIONAL SUPPORT UNIT COST

Table 7 summarizes the fiscal year 1992 statewide average unit cost and average cost per full-time equivalent student for each of the educational support areas. Table 8 shows the indirect unit cost for each community college district. Indirect costs include the cost of learning resources, student services, administrative data processing, general administration, general institutional services, academic administration and planning, and subsidy for auxiliary services. The costs of learning resources, student services, administrative data processing, general administration, and general institutional services are first allocated to the three functions (instruction, organized research, and public service) based on the proportion of professional full-time equivalent staff in each function. These costs then are allocated to each instructional area (i.e., PCS-CIP) by the proportion of semester credit hours in each area.

Academic administration and planning costs are costs above the departmental level that can be applied directly to the instructional function, but not to an individual department, and are, therefore, allocated only among the instructional areas. The salary for the Dean of Transfer Education, for example, is included here.

The cost for auxiliary services (e.g., bookstores and food services) in this study represents only the subsidy that a college provides to these services. If these services are self-supporting or profitable, costs for them are not included.

Total expenditures for each of the indirect instructional support categories are shown for each community college district in Table A-3 of the Appendix.

Table 7

#### Section V

### FISCAL YEAR 1992 NET INSTRUCTIONAL UNIT COST IN SEVEN INSTRUCTIONAL CATEGORIES

Table 9 lists the statewide average net instructional unit cost and the average cost per full-time equivalent student in each of seven instructional categories. This cost information is the basis for determining the state credit hour grant rate in each of these instructional categories. State Community College is excluded from this statewide total because it is not funded by formula. Table 10 displays the unit cost in each of the seven instructional categories for each community college district in Illinois.

Multicampus district unit costs for each instructional category are calculated in the same way that unit costs for single campus districts are calculated. This calculation treats multicampus districts as single-campus districts since the allocation of all indirect costs to the seven instructional categories is made on the basis of total credit hours in each category. Thus, consistency in comparisons among district unit costs is maintained.
